Understanding SAP’s Mobile Strategy

Understanding SAP’s Mobile Strategy

Improving work life wherever you are

HUMAN-CENTRIC EXPERIENCE

Makes virtual work and collaboration enjoyable and efficient

CONTINUOUS INNOVATION

Continually optimize business processes and efficiency

SCALABLE EXTENSIONS

Integrate multiple backends with easy-to deploy security, compliance, and version control, offering greater agility

Understanding SAP’s Mobile Strategy

Human-centric experience

Makes hybrid work and collaboration enjoyable and efficient.

- Cohesive micro-experiences for quick access to apps, processes, and information everywhere
- Tailored content and collaboration tools for best user engagement
- Modern and flexible hybrid work solutions for all mobile workstyles: from frontline to campus to home

Understanding SAP’s Mobile Strategy

Continuous innovation

Continually optimize business processes with intelligent technologies.

- Built on SAP BTP with the latest tools and SAP Fiori design language
- Leveraging the latest on-device intelligence and cloud technologies such as AI/ML, AR, notification service
- Managed mobile applications by SAP to save scarce development resources for strategic innovation

Understanding SAP’s Mobile Strategy

Scalable extensions

Provide easy-to-deploy security, compliance, and version control with greater agility.

- Integration into SAP systems (SAP S/4HANA, SAP S/4HANA Cloud, etc.) enables resilient end-to-end business processes and insights
- Easy-to-deploy security, compliance, and version control for proper IT management
- Integrated solutions provide a base of industry best and next practices through scalable extensions

Understanding SAP’s Mobile Strategy

Types of users

EMPLOYEES

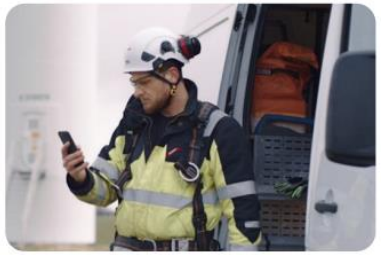
All services at a glance wherever you work

DECISION MAKERS

Make the right decisions right now

BUSINESS USERS

Real-time actionable insights

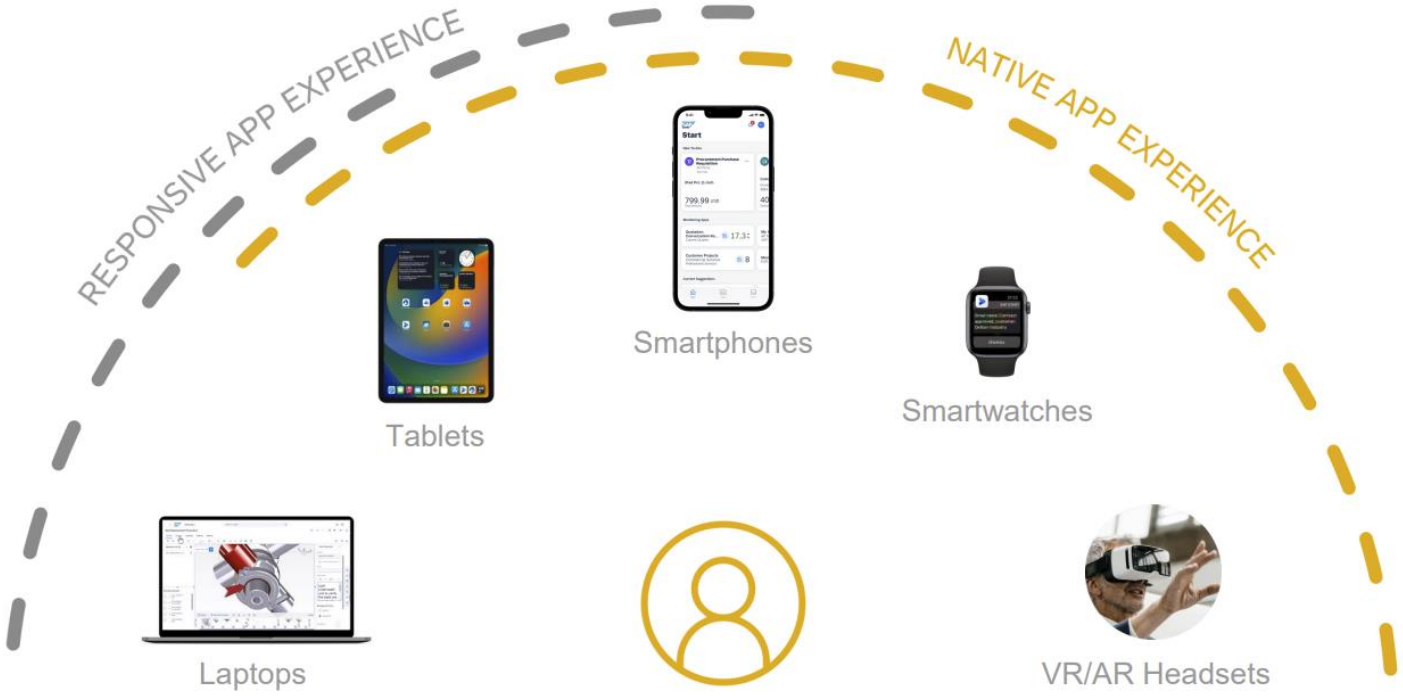


FRONTLINE WORKERS

Intelligent technology support on the spot

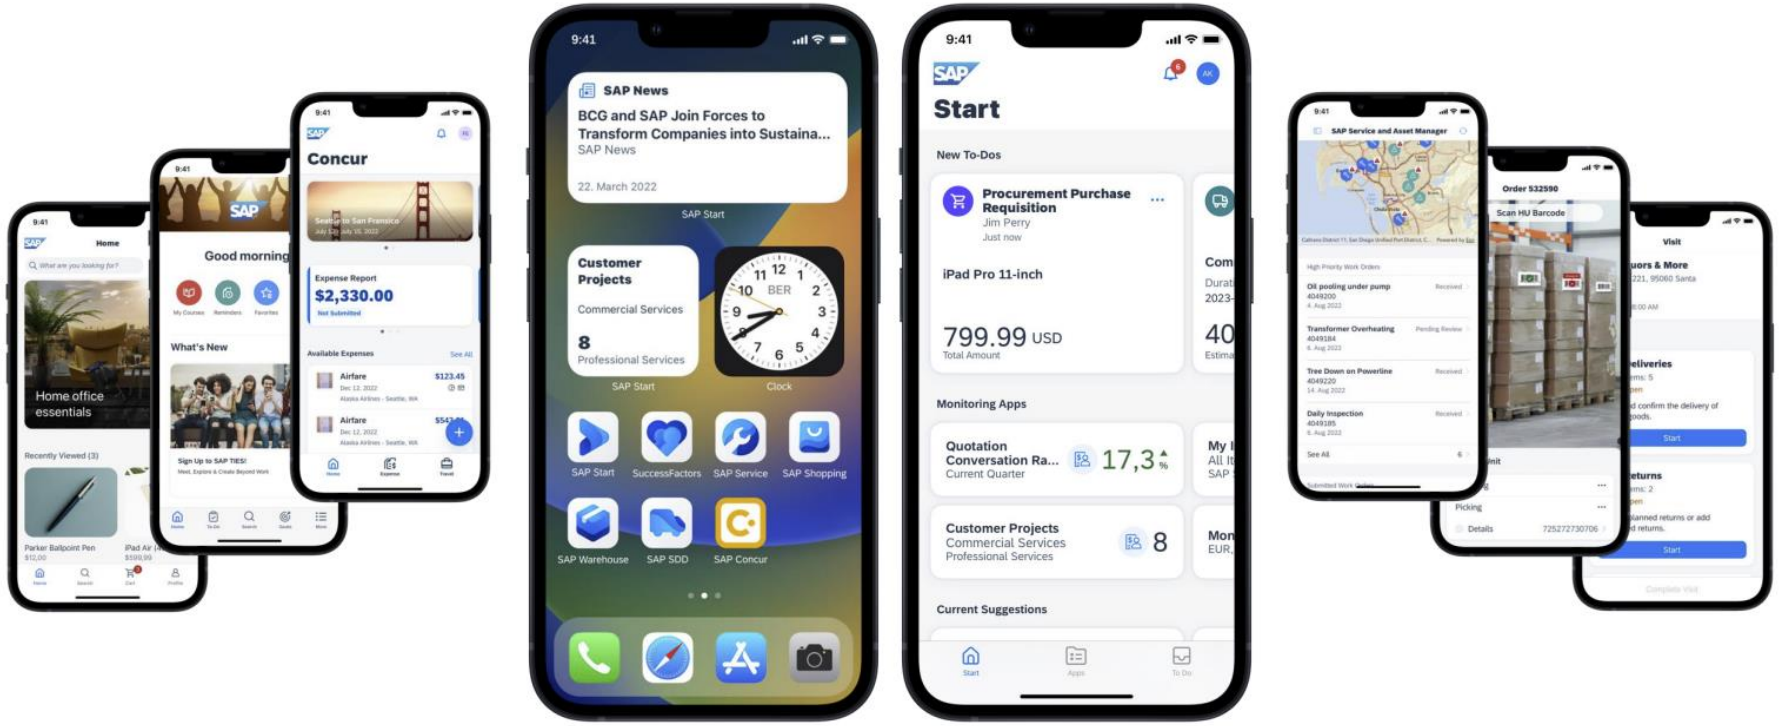
Understanding SAP’s Mobile Strategy

Various expectations in different work environments



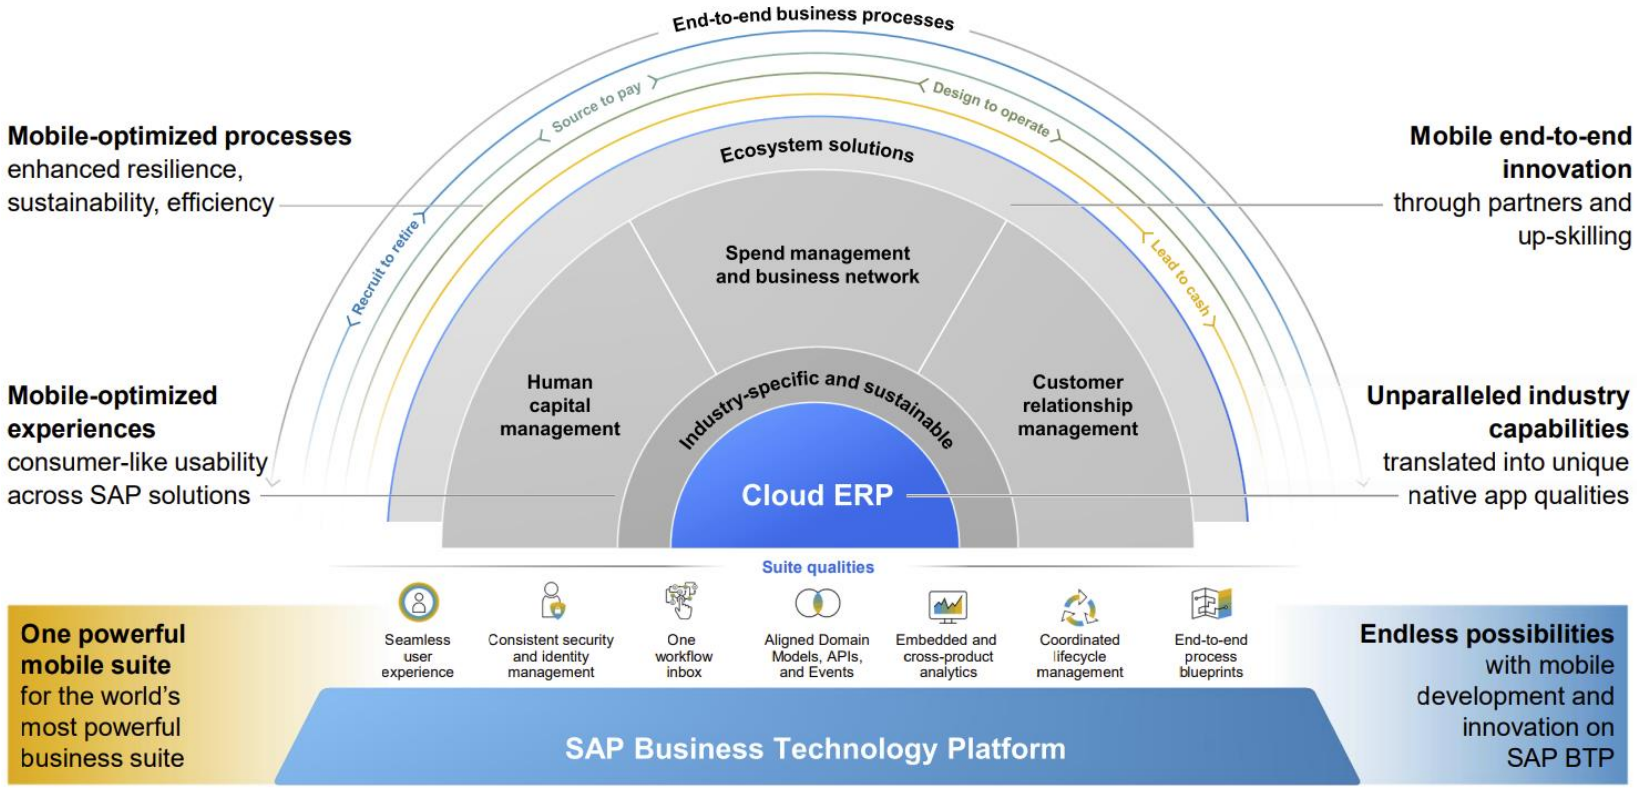
Understanding SAP’s Mobile Strategy

Meet the SAP mobile experience

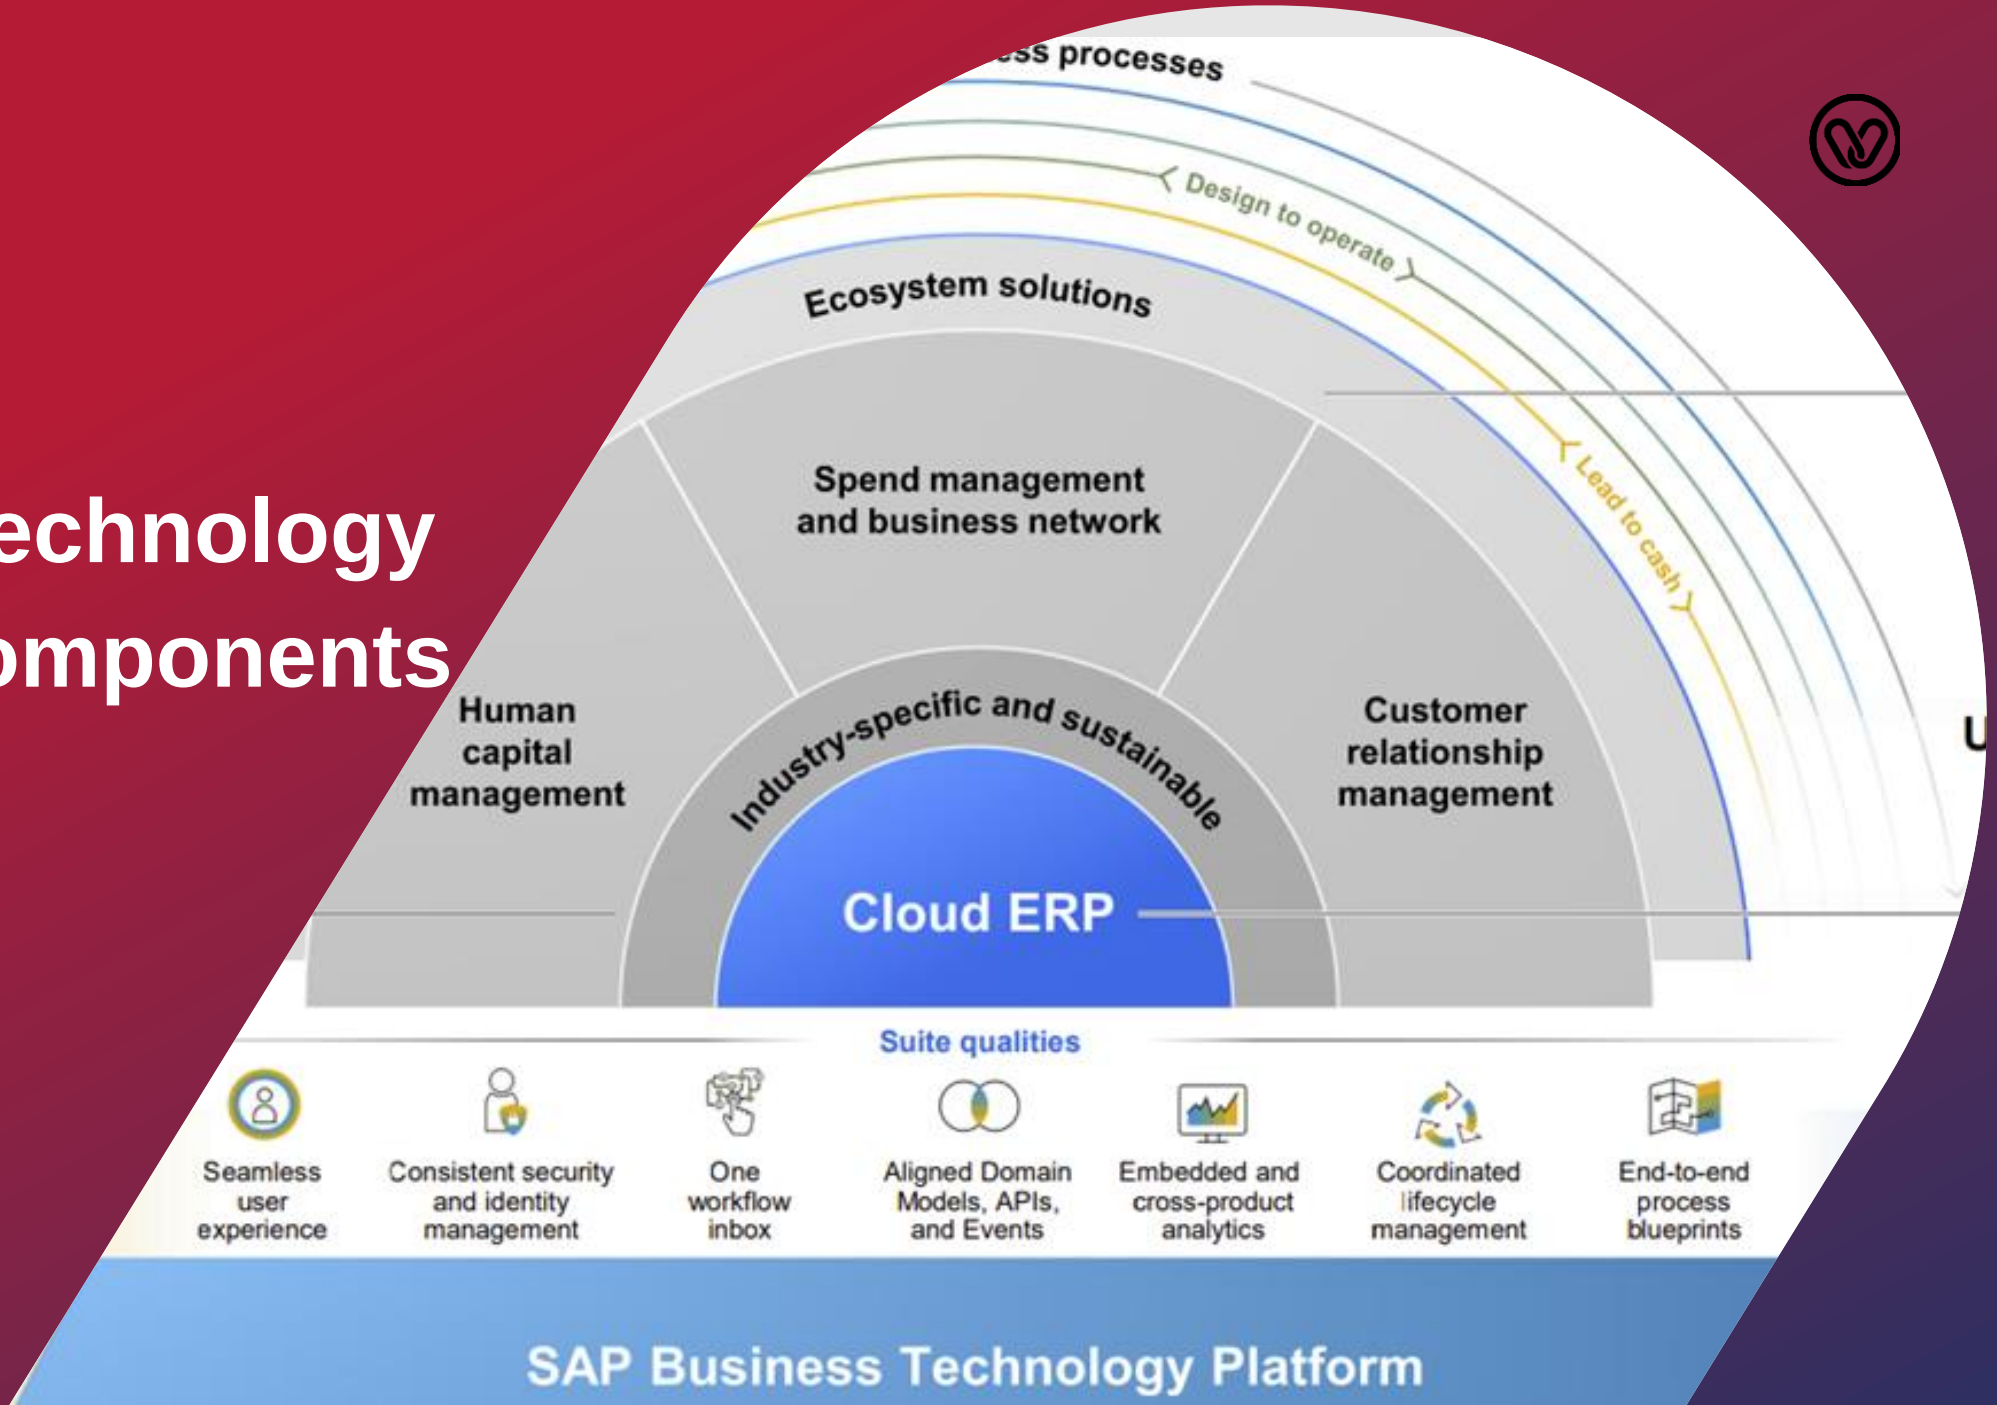


Understanding SAP's Mobile Strategy

One mobile experience for the Intelligent Enterprise



Business Technology Platform Components



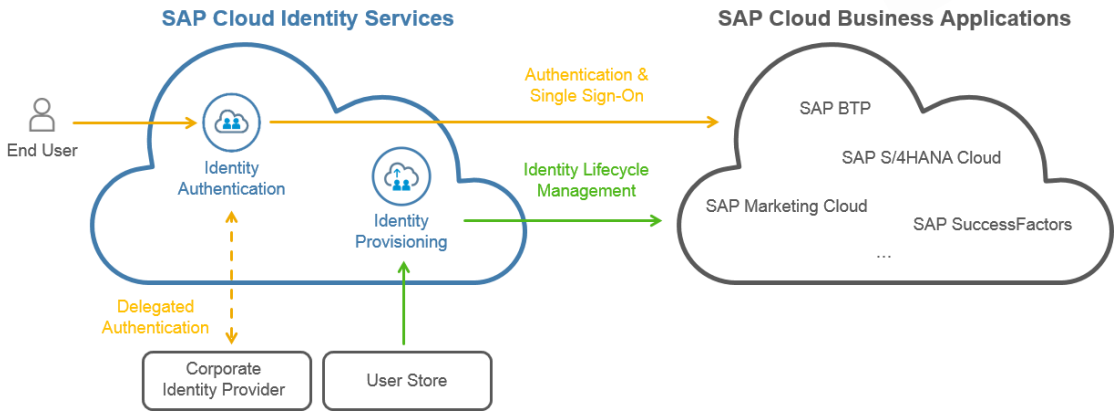
SAP Identity Services

SAP Identity Services

Overview

- Enable **single sign-on** throughout a (distributed) application landscape
- **Central user management and user provisioning**
- Link **corporate identity provider** (e.g., Microsoft Azure AD)
- Default service plan (test & production) **included in BTP contract** (free of charge, also in free tier)

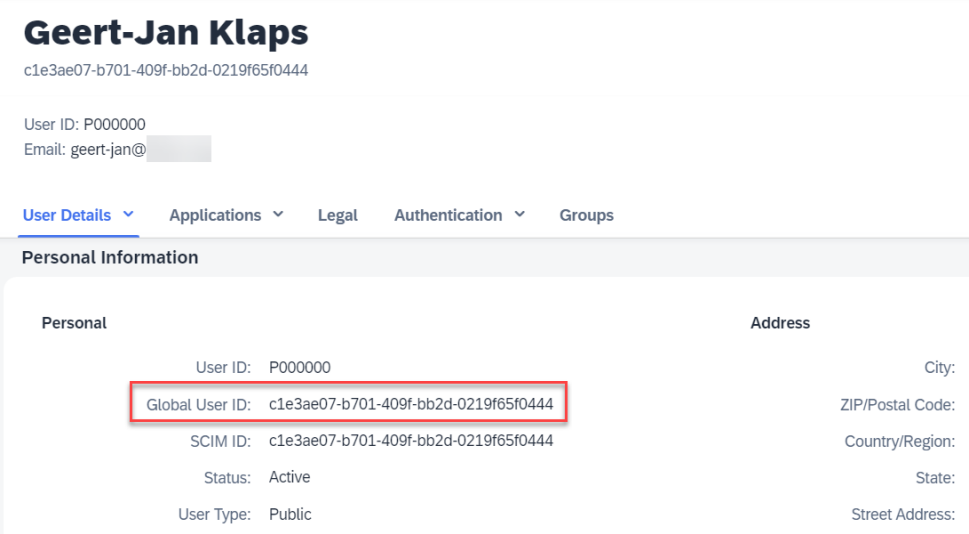
SAP Cloud Identity Services



SAP Identity Services

Global User ID

- Recently introduced
- **Cross-application** user ID
- **Central identification** of user
- Stored in Identity Authentication Service (IAS)
- **Provisioned towards compatible applications** using SAP Identity Provisioning Service (IPS)

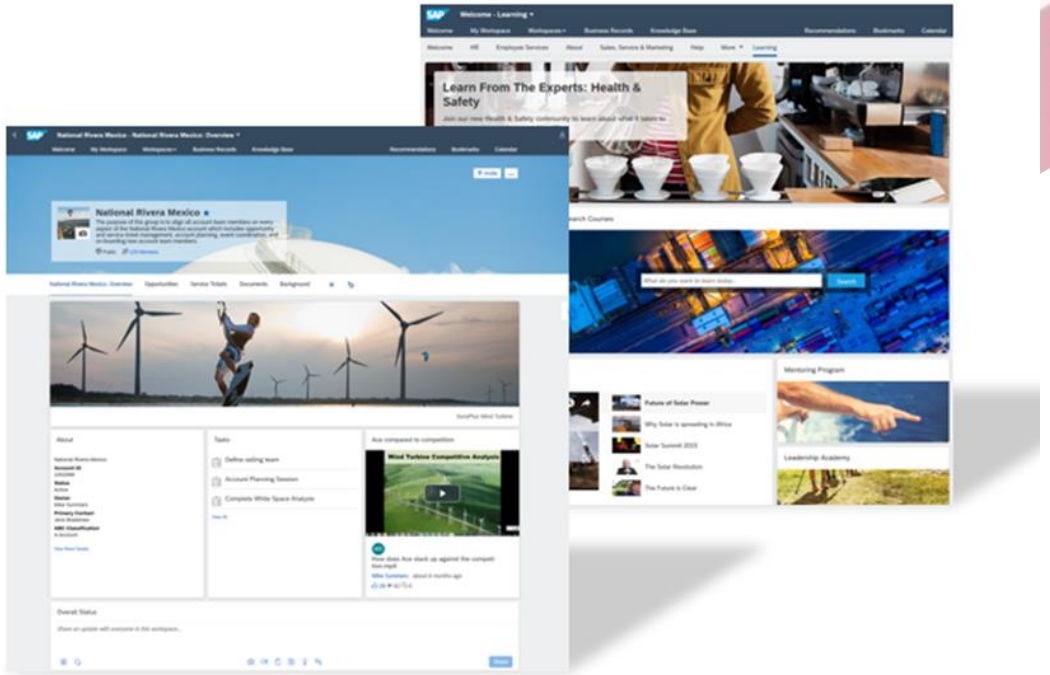


SAP Build Work Zone

SAP Build Work Zone

Overview

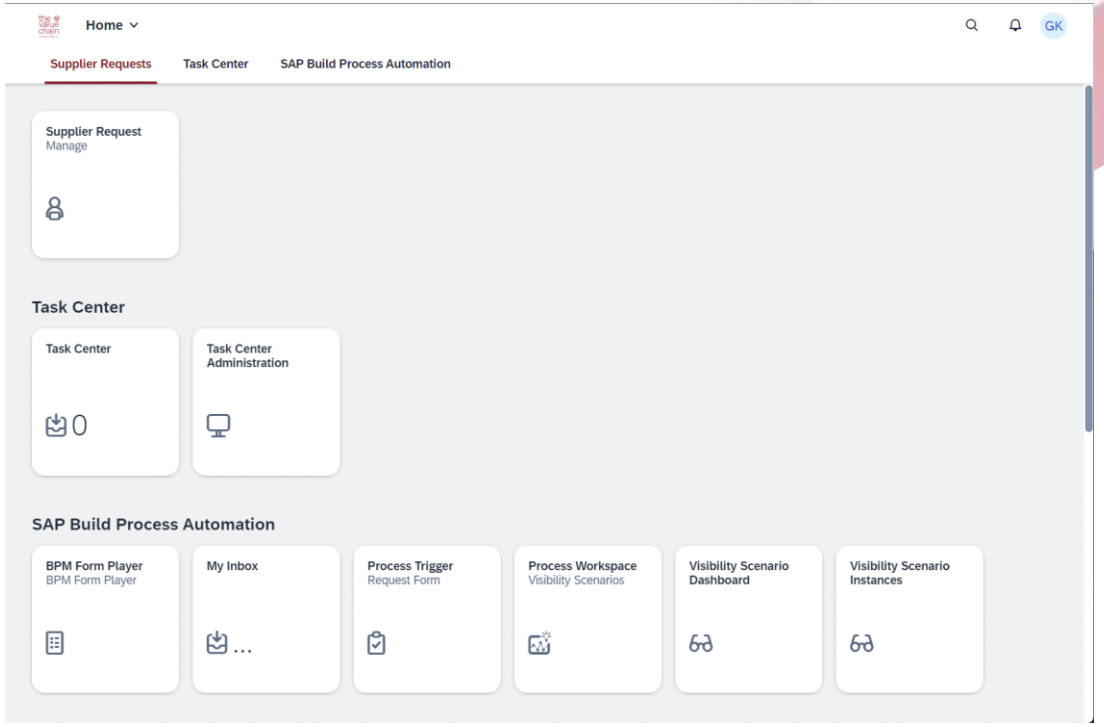
- Two flavors
  - **Standard** Edition
  - **Advanced** Edition
- **Low Code / No Code** solution for creating business sites
- Create **central entry point** to your Intelligent Sustainable Enterprise
- Increase efficiency & productivity of users / teams



SAP Build Work Zone

Standard Edition

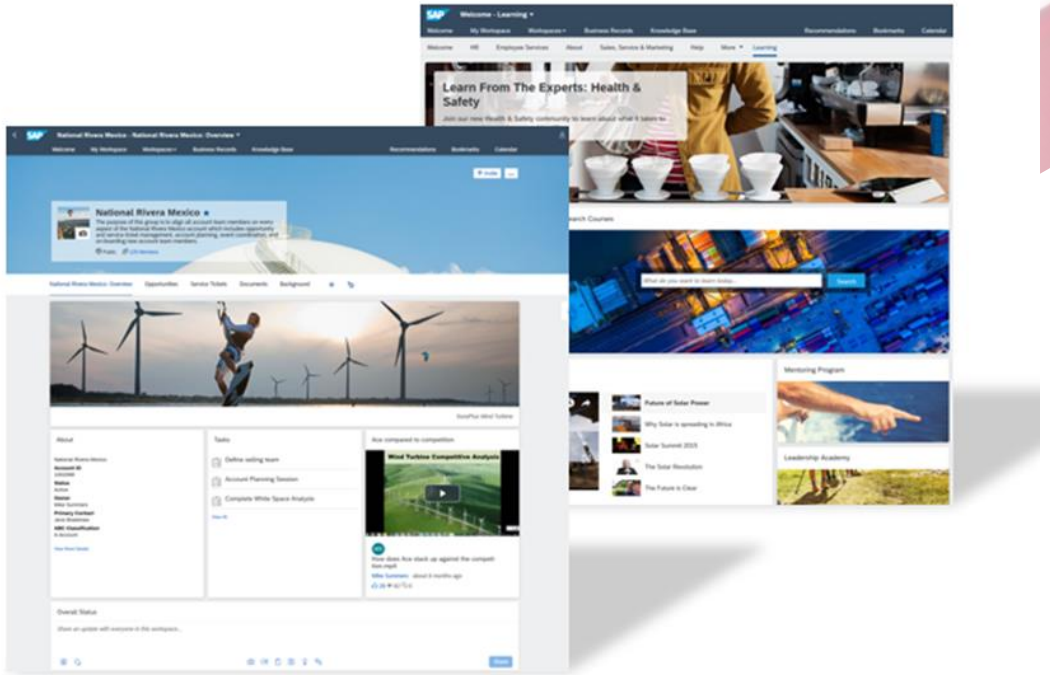
- Launchpad-like experience
- Fully theme-able with integrated theme designer
- SAP Mobile Services Embedded
- Extendable with UI Integration Cards
- Easily integrate apps from
  - S/4HANA (Cloud & On-premise)
  - SAP Integrated Business Planning (IBP)
  - SAP BTP ABAP Environment



SAP Build Work Zone

Advanced Edition

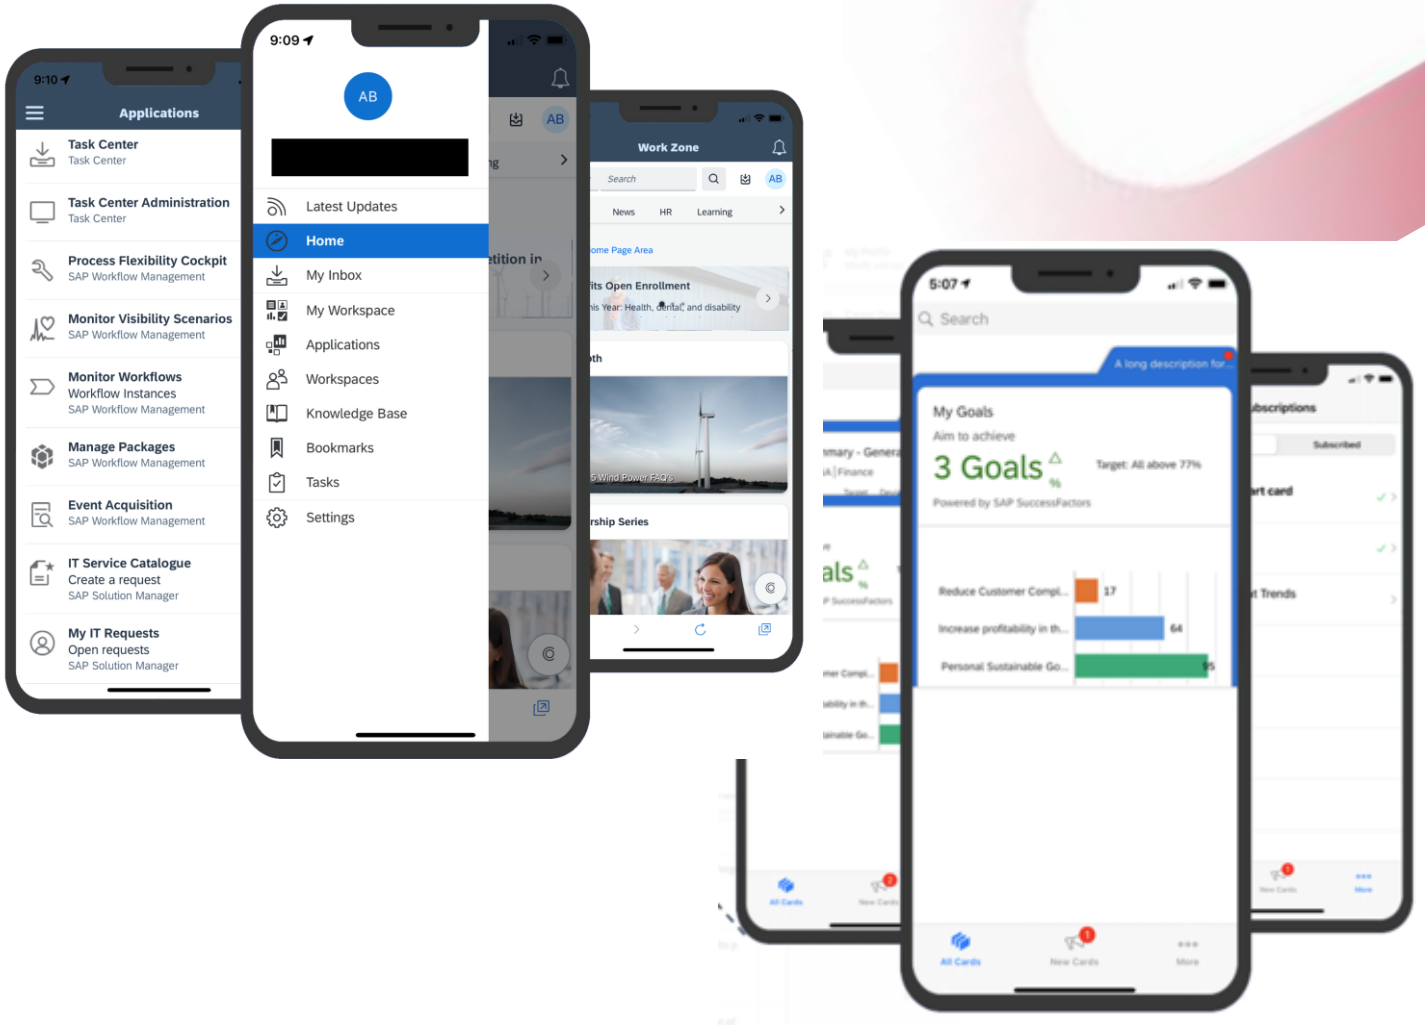
- Portal-like experience
- All features of standard edition, plus
  - Advanced Content Management
  - Knowledge bases
  - Workspaces
  - Integration with Microsoft Teams
  - Native Mobile Application available in iOS / Android app stores (SAP Build Work Zone Advanced)



SAP Build Work Zone

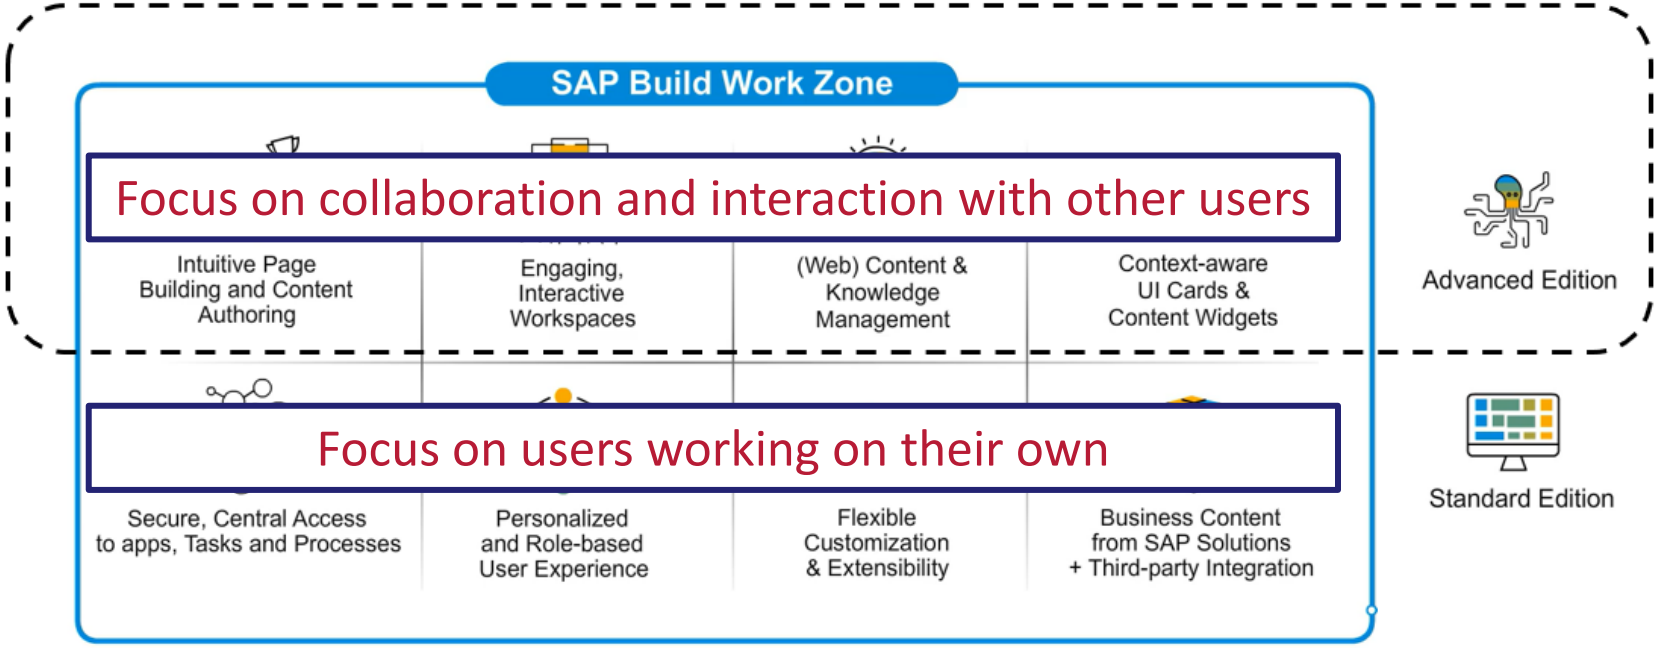
Native Mobile Applications

- Standard / Advanced Edition
  - SAP Mobile Start
  - SAP Mobile Cards
- Advanced Edition only
  - SAP Build Work Zone Advanced
- Available in iOS / Android app stores



SAP Build Work Zone

Choosing the right edition



SAP Build Work Zone

A modular offering for SAP's central entry point

SAP Fiori horizon theme
SAP Mobile Start

SAP Start

1

- SAP-managed homepage for SAP Cloud solutions
- Access apps and tasks from the connected systems
- Offering pre-configured cross LOB business content

Upgrade

SAP Build Work Zone, standard edition

2

- Provide a central access to multiple cloud & on-premise systems
- Integrate custom Low-code/No-code apps
- Access multiple pages via navigation menu
- Customizations and extensions (e.g. branding, translation, Shell plug-ins, domains URL)

Upgrade

SAP Build Work Zone, advanced edition

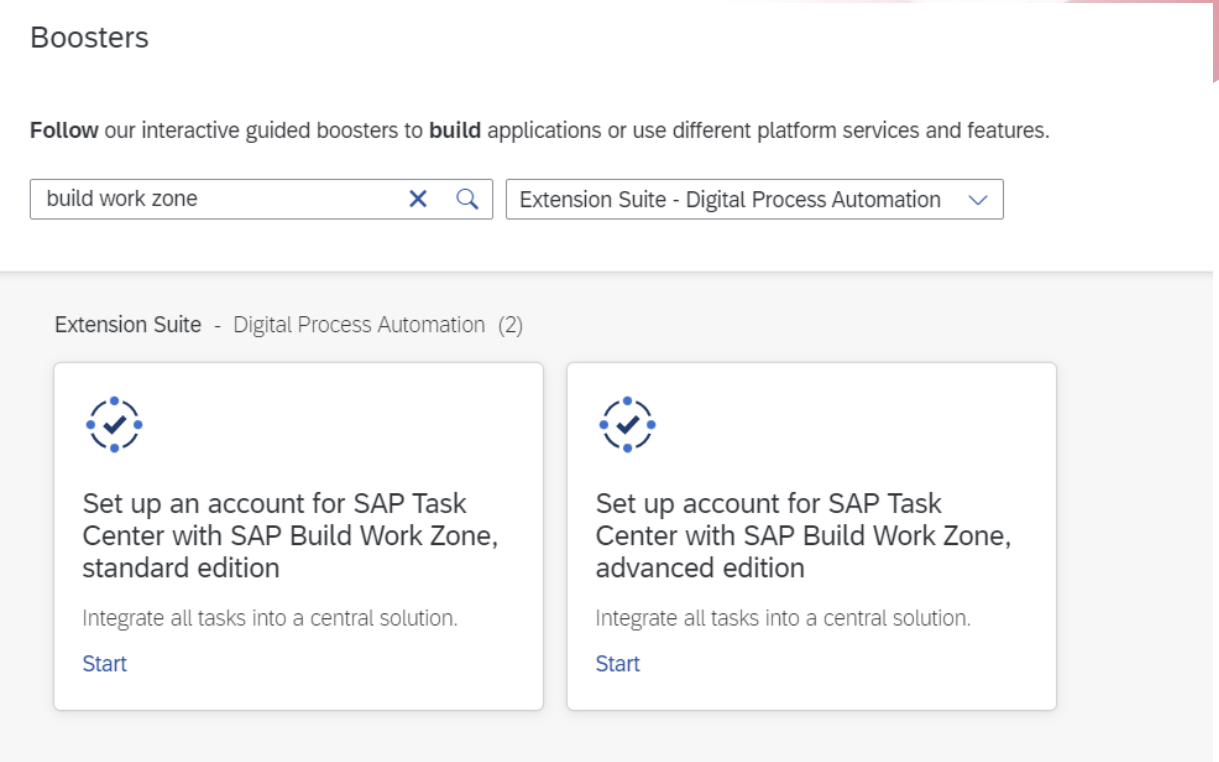
3

- Extend the standard offering with enhanced capabilities for content management, web content, team workspaces and integration with 3rd party solutions (e.g. MS Teams)
- Empower business users to create and publish content
- Provide solution specific premium content

SAP Build Work Zone

Easy setup

- Boosters
  - Standard Edition
  - Advanced Edition
- Includes SAP Task Center configuration

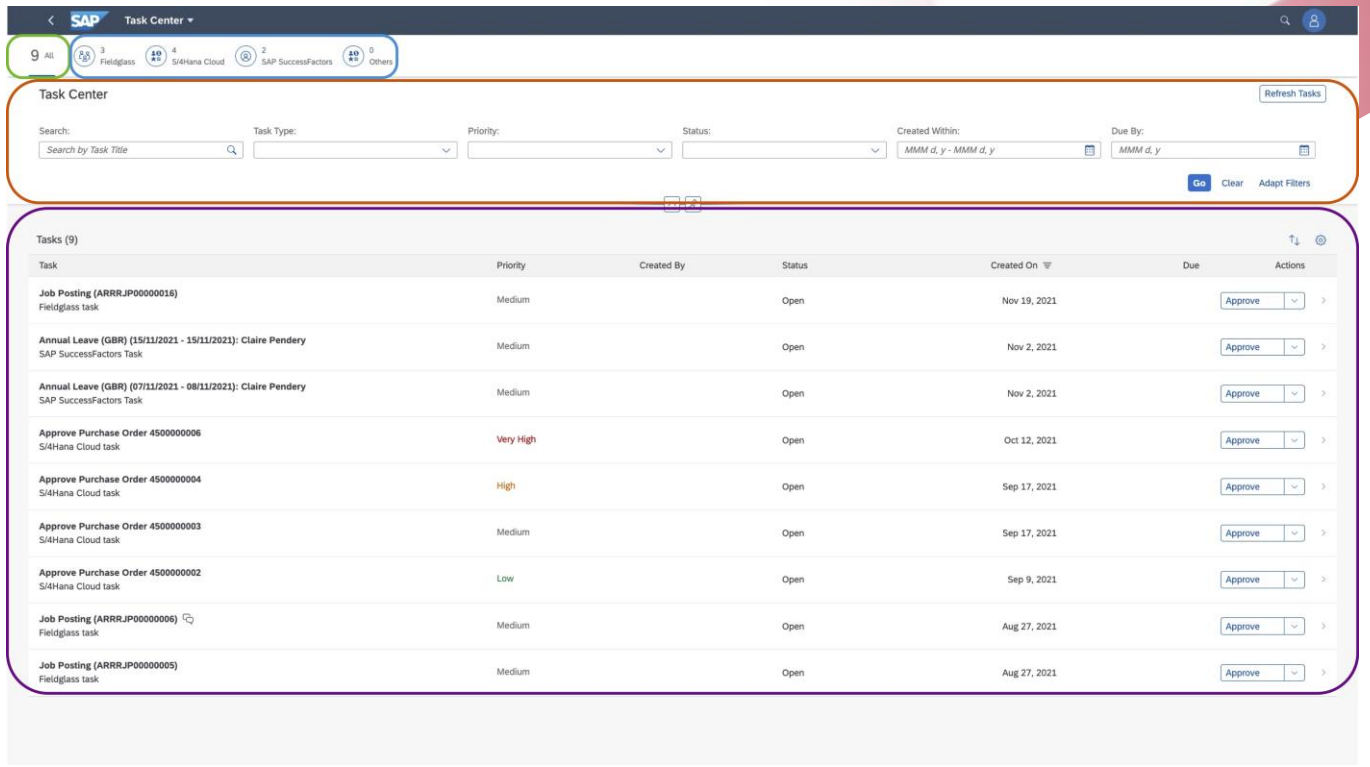


SAP Task Center

SAP Task Center

Overview

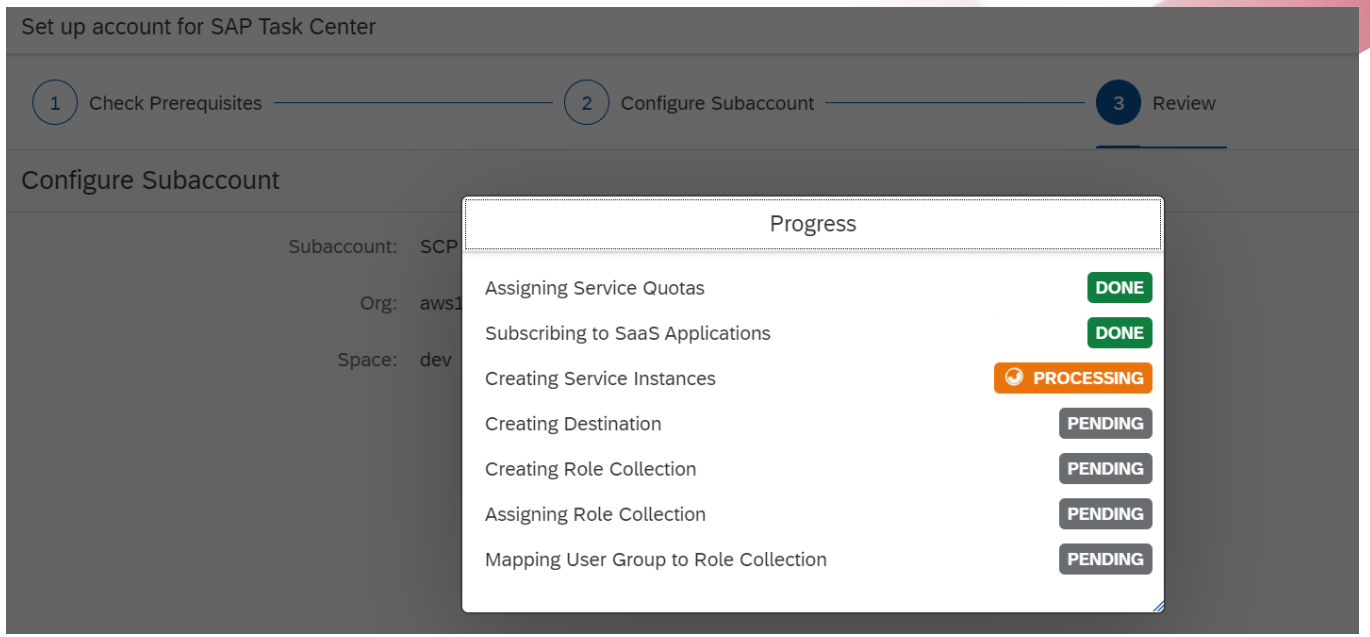
- Central cross-application workflow inbox
- Supports
  - S/4HANA Cloud / On-premise
  - SAP Build Process Automation
  - SAP Fieldglass
  - SAP SuccessFactors
  - SAP Ariba
  - SAP Concur
  - SAP Marketing Cloud
  - SAP Cloud For Customer



SAP Task Center

Easy setup

- Activate using SAP BTP Booster
- Setup connection with SAP Identity Authentication
- Setup connection with desired SAP Products *
- Assign roles to users / user groups
- Add tile(s) to Work Zone site(s)

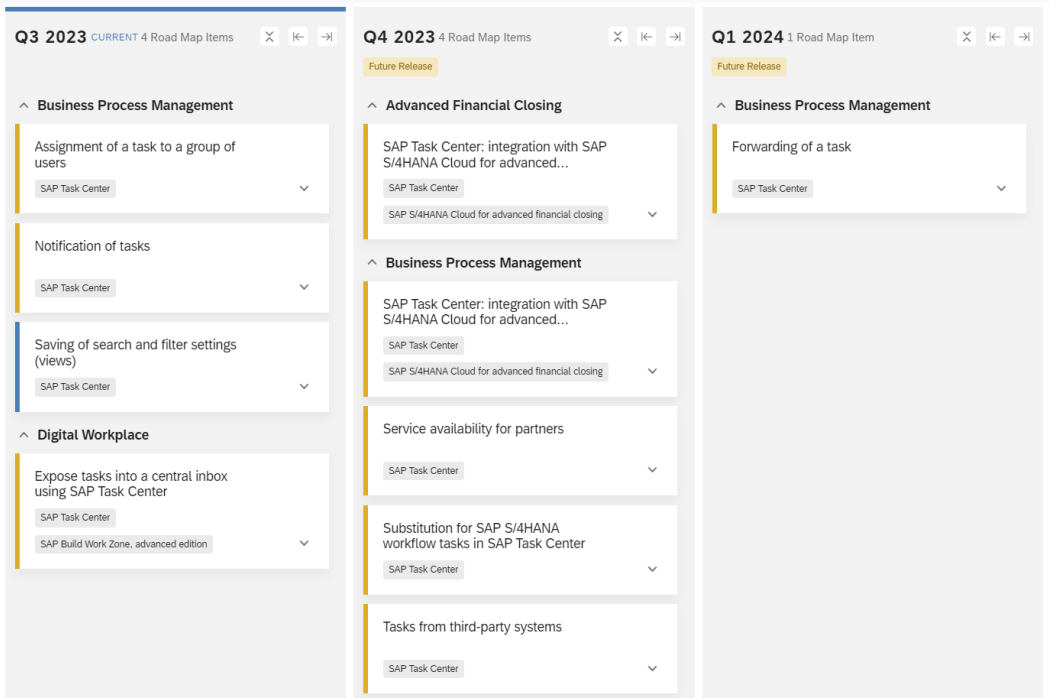


* Setting up connections is just a matter of configuring destinations

SAP Task Center

Current limitations

- Tasks assigned to groups are not supported
- No notifications for tasks
- No task forwarding possible
- Third-party integrations not possible

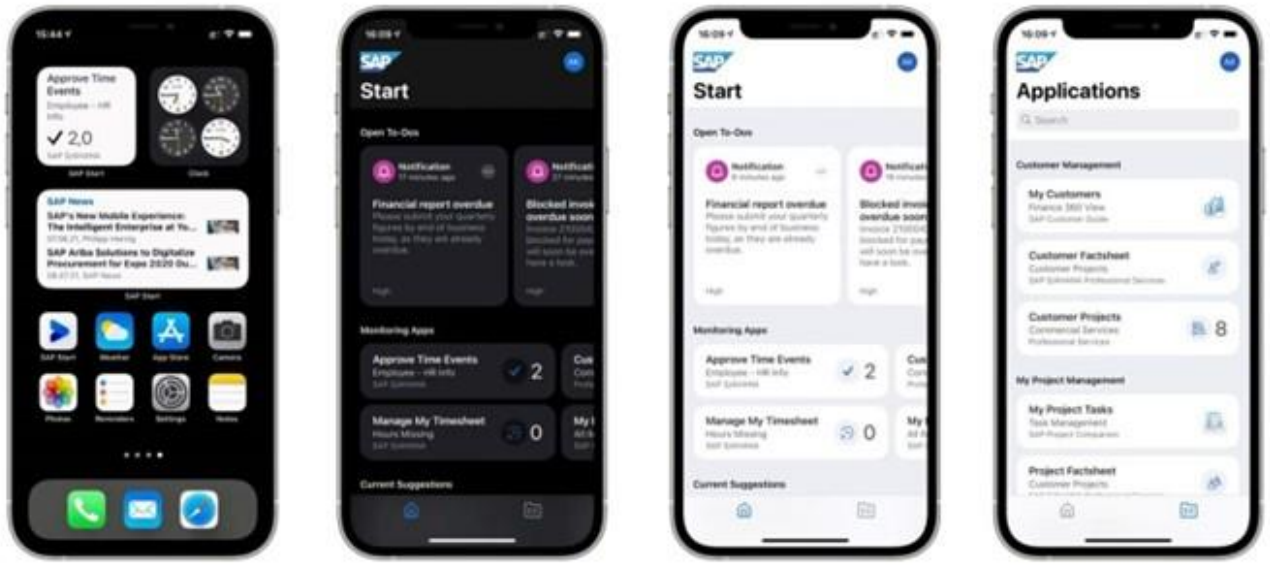


SAP Mobile Start

SAP Mobile Start

Overview

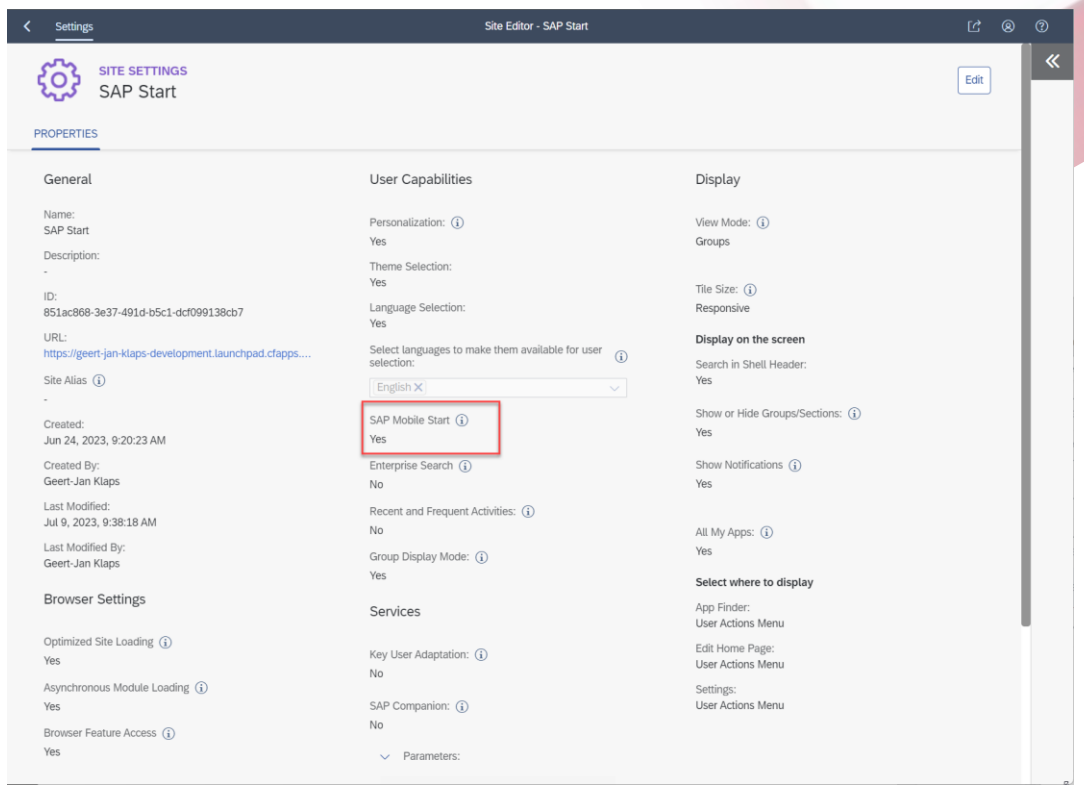
- Native mobile experience
  - Android
  - iOS / watchOS
- Supports home screen widgets
- Integration with spotlight search
- Central entry point
- Can be preconfigured using mobile device management (MDM) tools
- Theme-able
- Configured through SAP Build Work Zone Mobile Service Dashboard



SAP Mobile Start

Enabling SAP Mobile Start

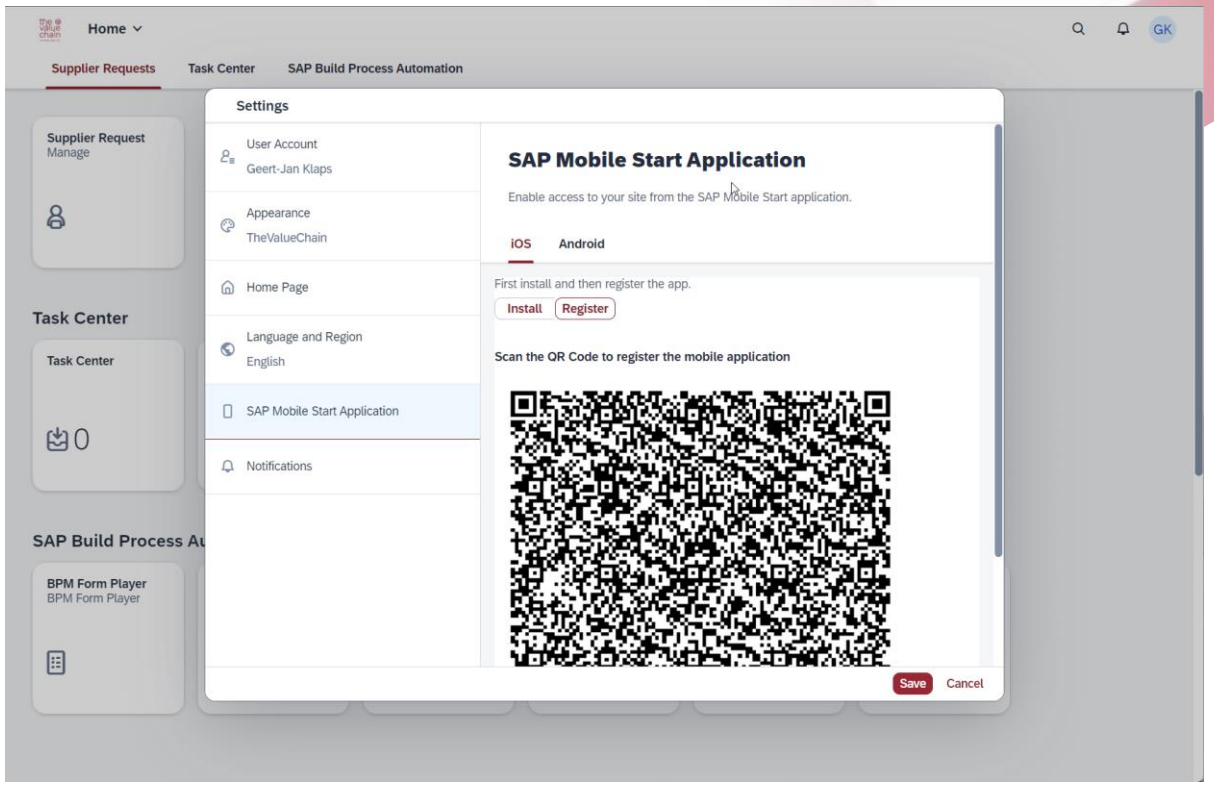
- Very easy
- Site setting in SAP Build Work Zone



SAP Mobile Start

Manual app configuration

- Available through user settings in SAP Build Work Zone
- Download through QR-code
- Register SAP Mobile Start through QR-code



SAP Mobile Start

Using Mobile Device Management (MDM)

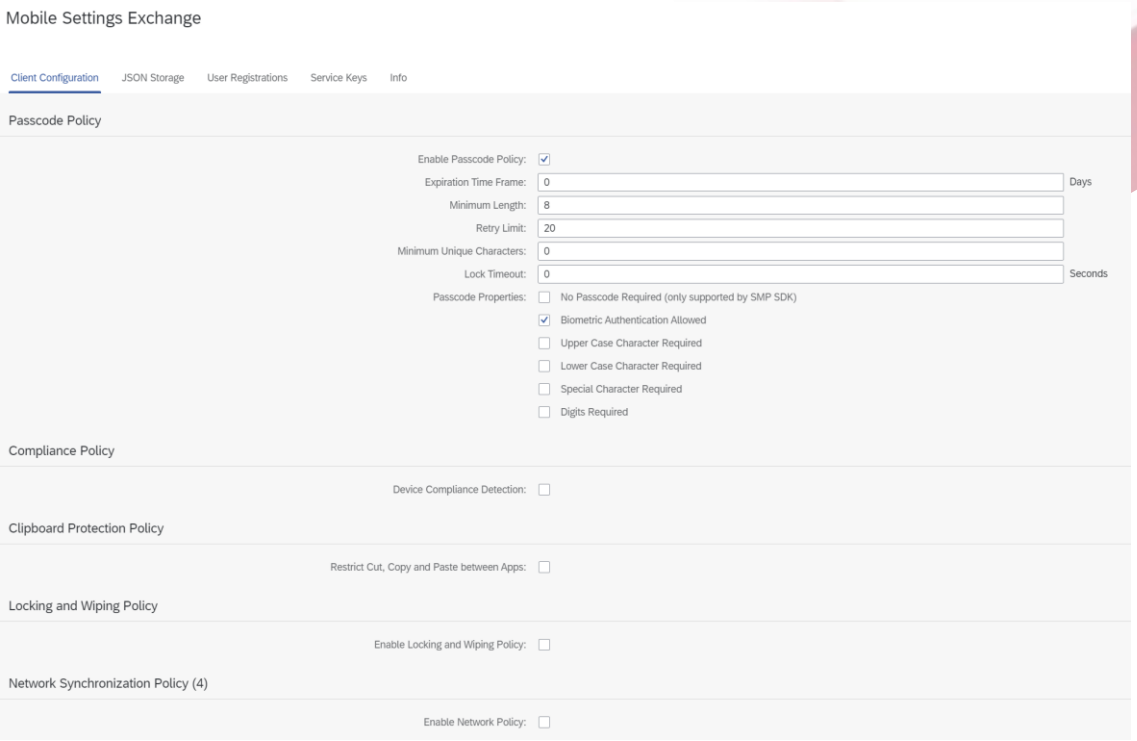
- Pre-configure SAP Mobile Start
  - Embedded mobile services host
  - SAP Build Work Zone Site URL
  - SAP Build Work Zone Site ID
- Use in corporate App Store

Property	Description
`com.sap.mobile.start.mobileServicesHost`	Tenant-specific SAP Mobile Services host, for example `mytenant.m.launchpad.cfapps.eu10.hana.ondemand.com` QR code property: `host`
`com.sap.mobile.start.launchpad.launchUrl`	SAP Build Work Zone, standard edition site URL, for example `https://mytenant.launchpad.cfapps.eu10.hana.ondemand.com/site?siteId=678a6sd76a-bah1-as32-asdas7bdhah` QR code property: `sapMobileStart→launchpadStartEndpoint`
`com.sap.mobile.start.launchpad.siteId`	ID of the SAP Build Work Zone, standard edition site, for example `678a6sd76a-bah1-as32-asdas7bdhah` QR code property: `sapMobileStart→siteID`

SAP Mobile Start

Security policies

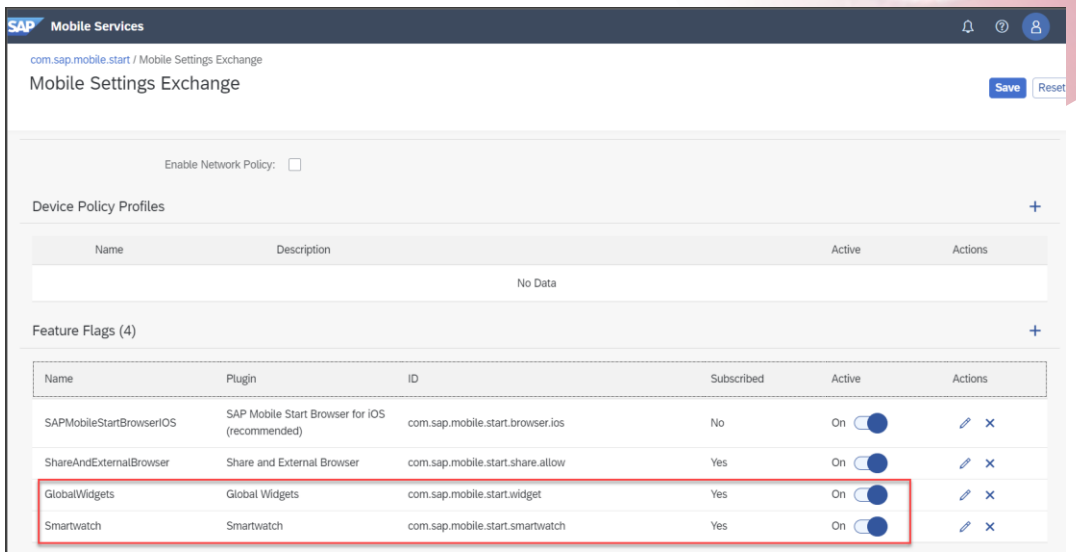
- Configure passcode policy (enabled by default)
- Enable
  - Device Compliance Policy
  - Clipboard Protection Policy
  - Locking and Wiping Policy
  - Network Synchronization Policy



SAP Mobile Start

Enabling widgets & smart watch

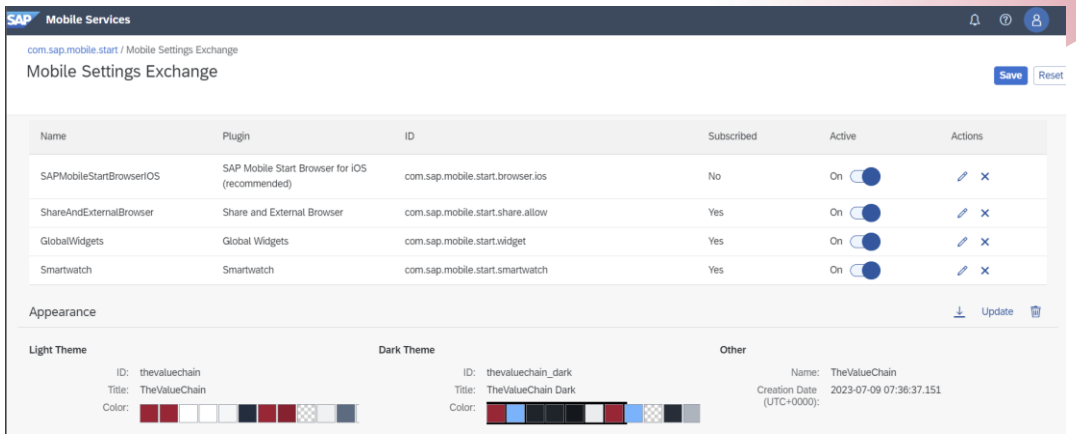
- Disabled by default
- Potential security risk
- Private / sensitive data can be displayed on lock screen / watch
- Settings in embedded mobile services admin cockpit



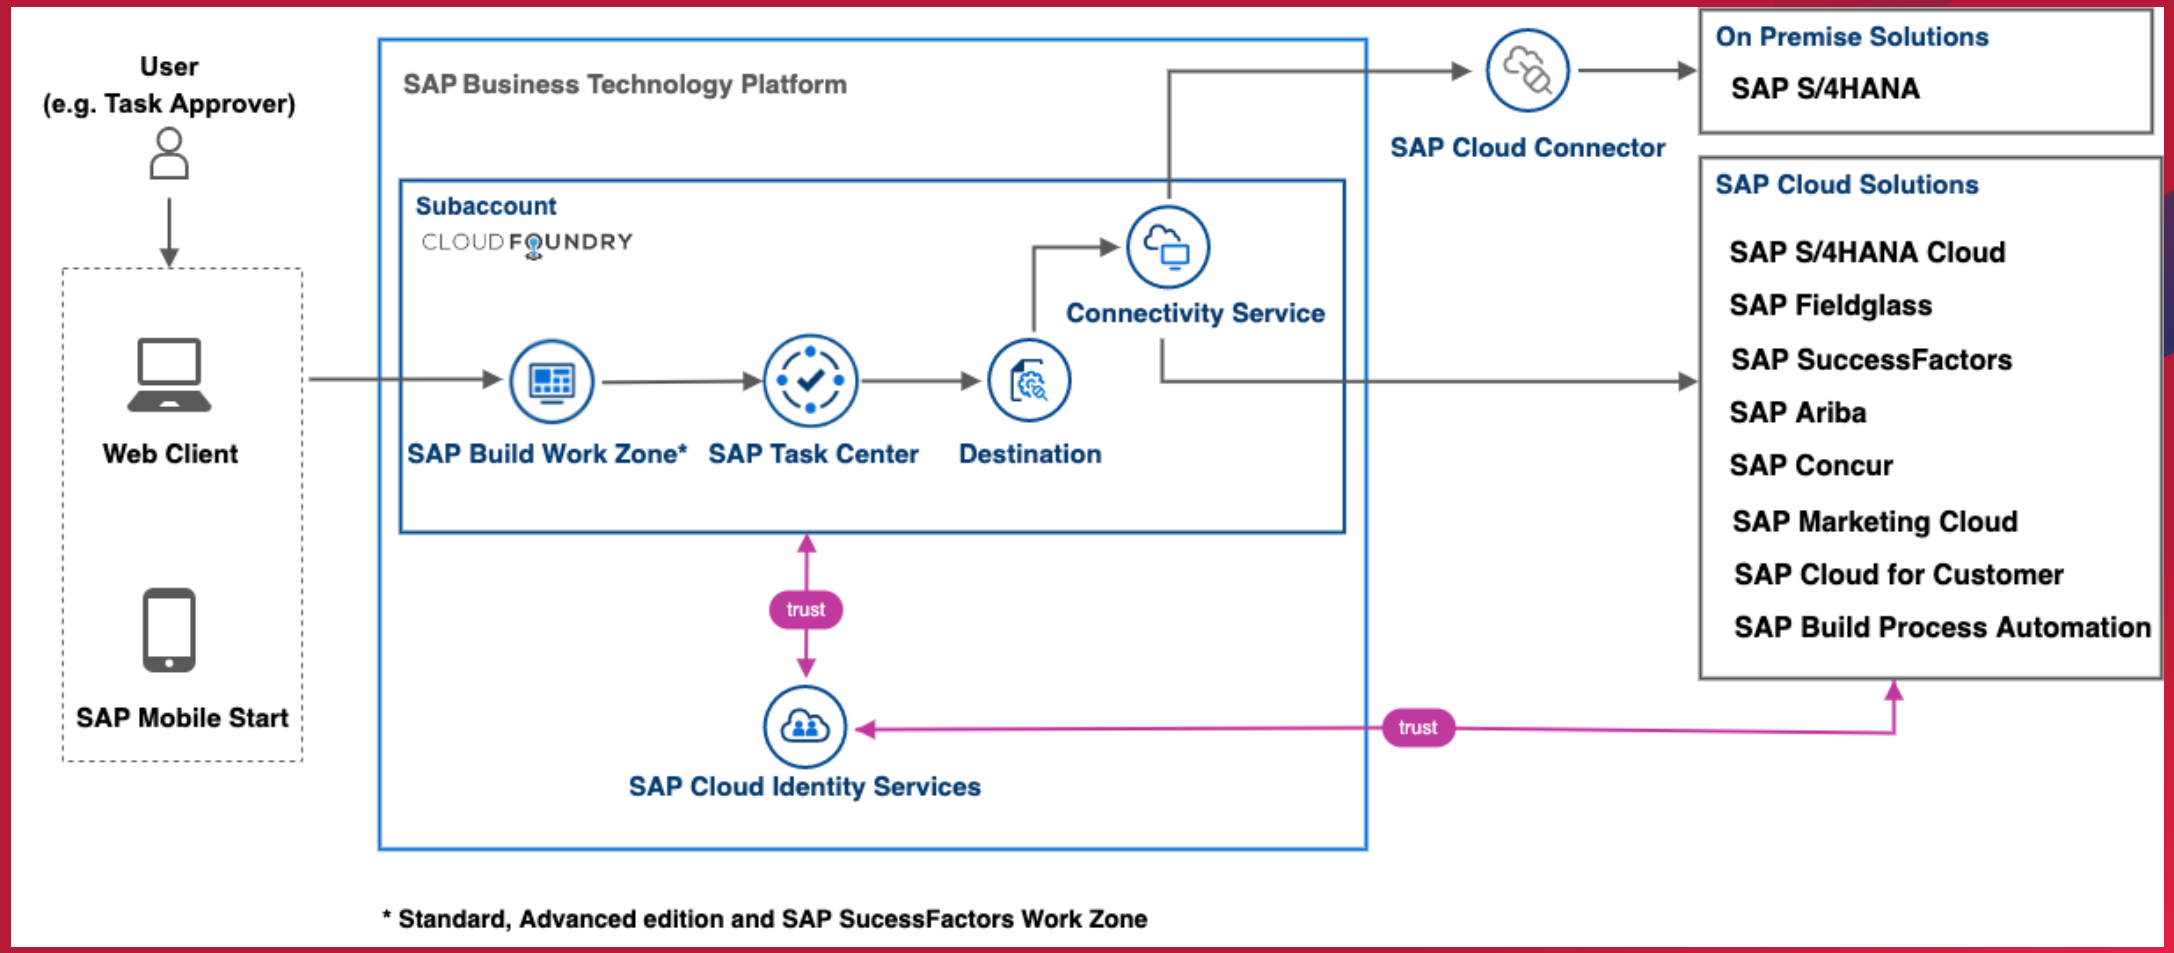
SAP Mobile Start

Theming SAP Mobile Start

- Export themes (light & dark) from SAP Build Work Zone Theme Designer
- Import into SAP Build Work Zone Mobile Services Dashboard



Putting it all together



Demo

Demo

Scenario

- Open SAP Build Work Zone site (desktop)
- Create Supplier Request (desktop)
  - Custom CAP application running on BTP
  - Trigger SAP Build Process Automation workflow
- Navigate through SAP Mobile Start (smartphone)
- Approve Supplier Request (smartphone)
